

Special Announcement

Following advice and safety guidelines from DEFRA, we are now in a position to resume the re-homing of some of the animals in Freshfields care. Certain cats, rabbits and other small animals are once again available to permanent, loving homes.

It has been necessary to temporarily alter our adoption procedures, in order to keep within the regulations and maintain the safety of staff. Please note it is currently not possible for potential adopters to come on site to meet the animals.

If you are interested in a particular animal, please contact the centre where that animal is currently located. A manager will get back to you in due course, to explain the new procedures in detail. Please be patient, this may take a little longer than usual as we are working with a skeleton staff, whilst finding our feet with this new system, and do not have reception cover of a weekend.

We are doing everything we can to ensure the right homes are found for our animals during this difficult time. This is always our priority.

Please note. We are not currently in a position to rehome dogs.

Thank you.
